Profile

Java Software Engineer with **5+ years of experience** in developing scalable web and microservices applications using **Java and Spring Boot**. Strong in backend development, deployment, and production support, with a continuous drive to learn and improve.

Experience

SYSTEMS ENGINEER | 10/2023 - Current

Tata Consultancy Services - Bangalore

- Designed and developed **high-performance Java applications** for Aadhaar identity verification, including **eKYC, OTP, and demographic/biometric authentication**, using **Spring Boot REST APIs**.
- Ensured **UIDAI-compliant security and privacy** by implementing encryption, tokenization, secure key management, and robust **exception handling, logging, and auditing** mechanisms.
- Integrated with **external UIDAI services** using secure protocols, handled **XML/JSON processing**, and optimized applications to support **high-volume, low-latency transactions**.
- Built and deployed scalable solutions using **JPA/Hibernate with MySQL**, CI/CD pipelines (**Git, Maven, Jenkins**), and **Kubernetes**, while providing production support and code reviews.

JAVA SOFTWARE ENGINEER | 06/2021 - 12/2022

Pearl Data Direct Pvt Ltd -Kochi

- Developing highly interactive and Customized UIs using JavaScript, HTML, JSP, Struts to Improve Functionality of Web Applications.
- Contributing to all phases of the development of a lifecycle
- Prepare and produce releases of software components.
- Conduct software analysis, testing, programming, and debugging.

TECHNICAL SUPPORT AND ERP IMPLEMENTATION ENGINEER | 11/2018 - 03/2021

C-Land Information - Palakkad

- Resolved complex Java-based production issues and application errors by performing root cause analysis, debugging code, and analyzing logs to ensure seamless ERP operations and minimal downtime.
- Optimized SQL Server performance and data integrity by writing advanced SQL queries and stored procedures to support critical business reporting and backend functions.
- Spearheaded backend troubleshooting and data management in SQL Server, ensuring accurate data flow between legacy systems and the ERP platform to improve overall system reliability.

Skills

- Java
- Spring Boot, Microservices, Spring MVC
- RESTful APIs, JSON, XML, Kafka
- MySQL, Oracle, SQL Server
- Jenkins, Git, Maven, Bitbucket
- Docker, Kubernetes, AWS
- Ceph, KeyDb
- Linux, Windows
- Encryption, Tokenization, Secure Key Management, UIDAI Compliance

Education

University of Calicut - BSC Computer Science 2017
